Reasons For Allowance

1. This application has been examined. The amendment filed 2/10/06 has been entered. Per applicant request, claims 1-27 and 35-40 have been cancelled.
2. The following is an examiner's statement of reasons for allowance: The amendment, in response to an Ex Parte Quayle, cancels out the rejected claims. Claims 28-34 have been allowed and are now the remaining claims in the application; thus the application is now allowable. Independent claim 28 (system) shows a novel authoring system with presentation data including at least one container object and two media objects containing media data of at least text or picture data, hierarchical structuring of the presentation data by nesting container objects within container objects to form a hierarchical object space, playback display associated with a master container object that contains the set of playing objects, a destination container object directly contained within the master container object and associated with a nested sub-display shown within the playback display, and which contains plural media objects playing and whose data is displayed in the sub-display, and user initiated navigation through the hierarchical object space with a preemption of playback for playing objects contained in the master container object which are not contained within the destination object, also with a transition such that the nested sub-display is no longer displayed in the playback display and the media data previously displayed

in the nested sub-display becomes displayed in the overall playback display.

The features combined are not set forth in the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
